MANAGEMENT POLICY

Cathodic Anodes Australasia design, manufacture and supply galvanic anodes, materials and equipment for protecting metallic structures against corrosion.

The ISO 9001-2008 standard provides us with a framework for benchmarking against Australian and international best practice and a foundation for continual improvement.

Our commitment to continual improvement includes, but is not limited to:

- providing our customers with high quality products, competitive prices and excellent service
- producing anodes which comply with nationally and internationally recognised standards and utilise effective manufacturing and laboratory practices
- providing a safe and motivated workplace
- ensuring the ongoing profitability of the company
- ensuring that our impact on the environment is minimised through effective manufacturing processes

By committing to these objectives we bolster our reputation as an industry leader.

A handwritten signature in black ink, appearing to read 'Ross Gorfine', is written over a light blue horizontal line.
